DISTURBANCES AT THE POLLS .- Quiet, for the most part, prevailed at the various poll districts in the different Wards during the forenoon of yesterday, but in the after part of the dey the immense quantity of liquor which had been imbibed began to show its effects, and in many cases fighting and quarreling were the results. At one of the election districts of the First Ward, a formidable fight was got up between a number of dranken rewdies, but the interference of the police soon quelled it, and several of the leaders were locked up in the Station-House. In the Second, Third, Fourth and Fifth Wards, no disturbance of a serious character occurred. As usual in the Sixth Ward considerable Egiting took place, but nothing of a serious nature transpired. Several of the fighters were taken, with black eyes and bloody noses, to the Station-House. In the Sixth District of the Sixth Ward, a fight took place in which clubs and stones were freely used. One man, living in Charlton-st., had his skull fractured. The Kelly ticket box (not the ballot box) was seized and broken to fragment. Several of the belligerents were arrested by Capt. Strennan, of the Sixth Ward, and his men, and locked up in the Tembs. Quite a serious fight took place in the Fourteenth Ward, between the friends of ex. Ald. Kelly and those of Mike Walsh, both aspirants to a seat in Congress from the same District. After some hard fighting, and several of both parties being floored by stones and other missiles, the police interfered and soon put an end to the disturbance. In some of the other up-town Wards slight disturbances took place, but we have heard of nothing serious as having occurred. In short, there was less fighting and rowdyiem than was generally anticipated by our citizens would take place.

Several arrests were made on charges of illegal votes

ieg. A man named Samuel Espie was arrested by or-der of one of the Inspectors of Election in the Fourth Ward, charged with voting illegally. He was committed by Justice Bogart to await examination. One John Murtigh was arrested by Officer Mcklanoy, of the Thirsecurh Ward, while offering his vote at the Fifth Poll District of that Ward, after having, as is charged, voted at the Third and Fourth Districts. He was locked up by Justice Weish to await exemination.

Three men, named James Donnelly, Nathaniel Cun-

minghests, of No. 345 Spring st., and Authory Rhyn, of No. 9 Thompson-st., were arrested, charged with voting illegally in the Eighth Ward. They were taken before Justice McGrath for examination.

Suprosed Munden-Escape of the Perpewater - The body of Mary Brown, an Indian woman, 30 years of age, was found on Monday night, in the rear of No. 5 Little Water-st., (Five Points), bearing upon it marks of violence. The deceased had been living with a mulatto, named Andrew Jackson, whom, it is alleged, best ber shamefully on Friday and Saturday of last week, and it is supposed that the violence in ficted upon her person by him, was the cause of her death. Soon after it became known that she was dead, Jackson fled, and has not since been heard of. The deceased was very intemperate in her habits, and this may have heatened her death. Coroner Ives has been notified, and will hold an inquest upon the body this

FIRE.-The various fire-bells throughout the The.—The various life-bells throughout the City last evening reng an alarm for the Vilth District, which fortunately proved to be false. The fremen turned cut in large numbers, and after dragging their machines through the lower part of the City, came to a balt at the corner of Broadway and Chambers-st.

The origin of these false alarms should be investigated, and the ringing of them stopped by the proper authorities.

At twelve o'clock on Tuesday morning an alarm was rung for the Vith District, which also proved

CHARGE OF MALICIOUS MISCHIEF.-Officer Neshit of the Fifth Ward, yesterday arrested a car can named Michael Kerrigan on complaint of Mr. 8, 8, Hinman of No. 15 West Twenty-fifth-st., who charges the accused with milicious trespase, in driving his horse and cart across the Eightk-av. rullroad track, and refusing to move when requested. He was taken before Justice Osborne for examination.

Supper Death .- A colored man named Cam-Sudden Death.—A colored man named Cambridge Ritter, on Monday evening, while engaged in unbading some grain from his wagon, at the Starch Factory of Mr. Morrison, in Forty-ecconder, near 9th Av., was suddenly taken ill, fell back against one of the barrels in his wagon, and expired in about five minutes afterward. His remains were taken to the 19th Ward Police Station, when an inquest was held upon them by the Coroner. Dr. Lidell made a post-mortem examination, which resulted in developing the workings of a disease of long standing. The jury rendered a verdict of death by Ancurism of the ascending norta.

Hugh McCrossin, in driving through Leon ridgin McCrossin, in driving through Leon-ardst, at about 4 o'clock on Monday afternoon, struck his carriage against a stage which started his horses into a run, the driver was thrown off and dragged at least a hundred yards, cutting his head and bruising his leg se-verely. Capt. Martin, of the police, stopped the team and had the injured man taken care of in a proper man-ner. Dr. Hossack attended the injured person.

TUESDAY, Nov. 2-P. M. There was a very active Stock market this morning, all the leading funcies being in demand and husyant. Long Island and Caston continue to attract most attention, although there was a large business done in other stocks. The sales of Long Island were 2,500 shares, opening at 314 and going to 34. After the Roard the quotations fell off to 32, but closed at the Second Board at 33]. The Philadelphians, it is reported, have already 50,000 of the 60,000 shares of this Stock, and leave the street short 10,000 or 20,000 shards. Great results are anticipated from the new management under which this road is to come. Canton, with sales 1,600 shares, was very buoyant, and went from 841 to 871, which was bid for it at the close. Two or three leading operators have recently returned from an examination of the property of this Company, and make large reports of its capababilities and value. estable liment of the décôt of the Baltimore and Ohio Railroad on the property will add largely to its value. Harlem was active and arm, with sales of 3,500 shares, closing at 71|@71}—an improvement of 1 $\overline{\Psi}$ cent. Stonington was better—56} at the close. Hulson River was well sustained. Reading is inactive and without important change. The Coal Companie are firm. Cumberland advanced to 66, and was firm. The business of this Company is now equal, we understand, to 180,000 tuns P annum. Pennsylvania Coal was 115. Nicaragua was also buoyant, and went to 284—an im-provement of 4 P cent. Some plans are in progress of arrangement which will add largely to the business of this route. There was a good demand for Government and State Stocks and Railroad Bonds at improving prices. Indiana 5e advanced 99%, and 25s were firm at 60. Eric Convertibles fell off to 994, but again, at the Second Board, touched 100.

After the Second Board the market was very buoyant, with active bluding for the leading Stocks.

The amount of business done for this steamer in Exchange, has been very large. The range has been 9210 P cent. The leading bankers drawing at 10 4º cent. The supply of bills from the South is considerable, and large amounts are expected. Cotton is coming freely in to the Southern ports, and going forward to market as rapidly as shipping can be obtained to transport it. There is also a considerable amount of bills made by the remittances of Stocks and Bonds to Europe. France are 5.15@5.134.

Freights are firm and rather active. To Liverpool, 25,000 or 30,000 bush. Wheat 7d., 5,000 bbls. Flour 2/, 500 bales Cotton (d., Oil &c. 20/, Resin 2/.-To London, Flour 3 , Naval Stores 8 , Oil, &c. 25 .-To Havre, 300 bales Cotton fe. To California there is a fair business doing at previous rates.

The receipts at the Sub-Treasury are \$104,450. Paid \$110,221. Belance \$5,963,520.

The supply of money is increasing and call cans are easily made at 5 \$ cent. Occasional loans on Government Stocks are made even lower, but the eurrent retes are 5 26 \$7 cent., according to security. Paper of first quality is scarce, and is passed at 54 did ? cent. if short, and 6@7 ₽ cent. if long

The Eagle Fire Insurance Company has made a dividend of 10 P cent.

The Bowery Bank a dividend of 4 P cent. The National Fire Insurance Company a dividend of 10 P cent, for the past six months.

The election for twelve Directors of the New-Jersey Zinc Company, which took place to-day, at the office of the Company at Newark, resulted in the election of the following gentlemen: Hon Richard F. Stockton, Princeton, Hon. Wm. Wright, Newark, Wm. Cooke, Trenton, James S. Greene, Trenton, W. C. Squier, Newark, Edwin Post, Stanhope, Chas. E. Detmold, Orange, N. J.; S. M. Stilwell, New-York; Horatio Allen, New-York; J. C. Hitchcock, New-York; Thomas A. Dexter, Boston; James L. Curtis, New-York. The charter of the Company requires that a majority of the directors should be selected from New Jersey, and we observe that the choice has fallen on those most distinguished as pioneers in her most successful enterprises; indeed, the whole character of the direction is a sufficient guarantee that there is both value and the enterprise to develop it, in the vast mineral property belonging to this Company.

For Dry Goods the trade still continues good. Considering the advanced period of the season, it is very active. Prices continue firm, and no sacrifices are needed to get rid of stock. Unbleached shirtings and sheetings are in good request at regular rates, with a limited supply. Bleached goods are also steady, without any excess of stock. Drills are buoyant. Browns have been active for export, and the supply is far short of the demand. Prices are almost neminal. There is an increased supply of Osnaburghs, with a fair demand, at old rates. Denims are dull, with some degree of heaviness in price, though there is no change to quote in prices. Stripes are active, with a light supply. Ticks are more abun dant, but steady. Canton Flannels are in deficient supply, and rates look upward. Prints are in active demand, at regular prices. The stock is reduced, and firmly held. Ginghams are steady at 10c. @10jc. Delains are in great request, though the excess of certain styles have induced holders to stimulate their sales by a reduction in prices. Light Grounds are firm, while Dark Grounds have declined. Cloths are in slack while bark crounds have declined. Cloths are in slack demand at old prices, which are firm, as this stock is small. A good demand prevails for Caselmeros at full rates. Satinets are steady, with rather loss activity. Tweeds and Jeans are dull. Linseys are dull, with a light stock. Flasnels and Blankets are both scarce, and in request at buoyant prices. Shawls are moving freely at well maintained prices. French Gor As ar still in request at good prices, but the stock ir, without variety of assoriment, and has been picker, of the best styles. Prime Silks are advancing in pri .e. Cloths are steady under a fair demand. Spring goods will arrive at a considerable advance in price. The French manufacturers have more order, than they can fill at an early period, and have some difficulty in obtaining workmen. British goods have been active enough to reduce the stock considerably, though the imports have been larger than last fall. Dress Goods of British make have fared better than usual, and sold well to the last. Shawle are brisk. Clothe are in fair request and steady. Blankets are active.

The aggregate Imports of merchandise at this port for the ten months past are about eight millions less than for the same period of last year. The Exports for the ten months show an excess of nearly \$760,000. The decrease in specie shipments, as compared with the same period of last year, is \$10,000,000. A letter from Capt. Rickard of the "Ulster"

mine, gives most important intelligence in regard to the

mine, gives most important intelligence in regard to the late discovery of copper. His letter says:

"We have to-day opened into the top of the cavera-from the bottem of the drift. The top of the cavera-tivery rich in ore, both lead and copper. The vein of lead ore is in some places five and six feet wide. We threw cut to day over seven trass of lead with one blast. The vein is still growing richer."

The Cavera-ti will, he remembered, we discovered. The Cavern, it will be remembered, was discovered

37 feet from the surface in the shaft which is sunk at the foot of the mountain. It has now been discovered in drift, which is driven into the hill, we believe, some forty feet above the mouth of the shaft. Conscquently its extent thus for is known. There is a fair business doing in first class

securities for transmission by the steamer. The best reilroad stocks are attracting the attention of foreign capitalists, and several hundred shares of Albany and Schenectady, Michigan Southern, Erie, &c., have been purchased on foreign account. Of bonds, the best Western roads are taken with considerable freedom, and prices tend upward. The supply is moderate.

The receipts of the Hudson River Railroad for the month of October were about \$104,300.

The reports of Coin from Boston for the ten months of 1852 just passed were \$2,961,925.

The Boston Journal says: The Money market has settled down to a quiet, easy condition. Interest rates on the best clauses of loans, whether on paper or desirable stock collaterals rule at 6 per cent., which seems to be the bottom line for all which commands first clars credit. Sales of the Carry Improvement Company have been made at \$10, and that price was offered for several lots, which were not supplied. The Waverly Company, although not active, is very firmly held at prices current last week. The managers of these two land compenies, with energies and means to carry out their designs, are occupied in improving and developing the property belonging to each
